

Pagination Details

The common response parameters for a request sent in the REST API response by the PubMatic platform are as follows:

Parameter name	Type	Description
startIndex	Integer	Start index for the response data.
endIndex	Integer	End index for the response data.
totalRecords	Integer	Total records matching the requested parameters' criteria.
request.pageSize	Integer	Paginated response's page size.
request.pageNumber	Integer	Paginated response's page number.
