

OpenWrap SDK Training Videos

OpenWrap SDK lets you leverage PubMatic's robust platform of OpenWrap capabilities within your mobile app. In this training, we will cover how to get started when integrating OpenWrap SDK by reviewing prerequisites for your project, then step into Banner and Interstitial code examples for our supported ad servers.

Video content will be based on steps outlined in the [OpenWrap SDK Integration Guide](#) located within the PubMatic Community. We highly recommend that you use this documentation along with the video to compliment your training experience.

In the event you have any questions, please feel free to contact your account manager, who can further assist you.
